

Install Microsoft Office 365 on a personal device

All state school staff and students can download multiple free copies of the Microsoft Office 365 suite to their personal home and mobile computer equipment.

To download the free software, staff and students require an active Managed Internet Service (MIS) login, school email account and password - those who don't have these should contact their school's MIS Administrator. The administrator will help students activate their MIS login.

Please ensure the following instructions are performed on personal devices only. They are not to be used on department or school owned devices which have the Managed Operating Environment (MOE) build installed.

If you experience issues during the download, speak to your school's MIS Administrator.
